PROJECTS

CarBnB (JavaScript | React.js/Flux | Ruby on Rails | PostgreSQL)

[Live Link](#) | [Github](#)

A full stack, single-page car sharing application inspired by AirBnB

- Integrates Google Search/Maps APIs for autocomplete, geolocation, and search functionality
- Implements React components to execute real-time front end refreshes as the underlying data changes, resulting in component modularity and automatic content updates
- Leverages a JavaScript front end to communicate with a Rails backend through AJAX requests
- Stores image uploads in the cloud using Amazon Web Services, allowing app scalability

BounceBreaker (JavaScript | Canvas)

[Live Link](#) | [Github](#)

A browser game based on Swipe Brick Breaker with precise ball angling, bouncing, and collision detection

- Creates dynamically changing bricks by designing brick objects to have coordinates, colors, and power levels that change based on collision events
- Analyzes collisions between the bricks and the ball by checking for overlapping coordinates

ArchitectureLite (Ruby | SQL)

[Github](#)

ActiveRecord-inspired Object Relational Mapping

- Dynamically generates complex SQL queries through metaprogramming

SKILLS

JavaScript	React.js	Ruby	Ruby on Rails	Flux	jQuery
SQL	CSS	HTML	Git	RSpec	Canvas

EXPERIENCE

Goldman Sachs

New York, NY

Investment Banking Analyst

July 2014 - April 2016
